

Paul Wamocha

Program Manager: AI for Education and Digital Inclusion

Nairobi, Kenya | +254 708 898 939 | wamochapaul@gmail.com | github.com/wafspaul

PROFESSIONAL SUMMARY

Six years managing digital inclusion and AI literacy programmes across Kenya, with a technical grounding most programme managers do not have and a policy engagement record most practitioners cannot claim. Trained 6,000+ learners, including 700 refugees at Dadaab with a 60% employment rate within three months. Built live digital tools now used by NGOs and county governments for infrastructure planning and programme targeting. Submitted an individual petition to the Kenya Senate on the AI Bill 2026 and proposed three amendments to extend AI governance protections to Kenya's 17 million informal workers. One of very few practitioners in East Africa to engage directly with national AI policy at that level. BSc Telecommunications & IT (Kenyatta University, 2017). Certified in project management (Google, ICDL), cloud (AWS), and data analytics (Power BI).

PROFESSIONAL EXPERIENCE

Senior Program Officer, Digital Skills & AI Literacy | Emobilis Mobile Technology Institute *Apr 2020 to Present*

Ajira Digital Program | Nairobi, Kenya

- Designed and managed end-to-end digital literacy and AI skills programmes for 6,000+ learners across Kenya: programme design, curriculum development, implementation, MEL framework, and donor reporting in line with Kenya's National Digital Employment Strategy.
- Served as Category Team Lead for AI, Graphic Design, Digital Marketing, and SEO: coordinated a team of 10 trainers through weekly performance review and planning sessions, set delivery targets, and maintained curriculum consistency and learner outcome standards across the national programme.
- Led Ajira Digital delivery across Lower Central Kenya (Nyeri, Murang'a, and Kirinyaga counties) as Regional Trainer Lead: managed 5 trainers and 20 Ajira club leaders across 4 institutions; launched and activated Ajira clubs at Karatina University, Dedan Kimathi University, Nyeri National Polytechnic, and Kirinyaga University. Students recruited peers, shared skills, and secured online work independently. The programme kept running after the trainers left.
- Negotiated and managed a cross-sector partnership with the Danish Refugee Council; co-designed and delivered a digital skills curriculum for Dadaab refugee camps: 700 trainees, 60% employment rate within three months of programme completion.
- Established and scaled a community tech hub from zero to 250 monthly active users in partnership with the LEO Project; 60% of participants secured freelance income within the programme period.
- Coordinated NOFBI technical connectivity expansion to 15+ institutions in Kajiado County: 2,000+ students gained reliable internet access for the first time. Managed all stakeholder liaison, site visits, and on-site installation.
- Managed Moodle and Google Classroom platforms; built and maintained Power BI dashboards for real-time programme effectiveness tracking, results-based management, and donor reporting.
- Coordinated with government agencies, community organisations, and institutional partners to identify programme entry points, negotiate new opportunities, and expand geographic reach.
- Contributed AI and digital workforce domain expertise to the joint EdTech East Africa stakeholder memorandum submitted to the Clerk of the Kenya Senate (2026).

Management Trainee, ICT Authority Kenya | Kenya Revenue Authority *May 2018 to May 2019*

Presidential Digital Talent Programme (PDTP Cohort III) | Nairobi, Kenya

- Led ICT implementation of NIIMS, Kenya's national digital ID system: device-region mapping, IP configuration, and server communication protocols at national scale.

- Integrated machine learning into KRA's tax filing workflow for automated error detection: 40% reduction in manual input, 25% improvement in data accuracy. First ML integration in the department's history.
- Configured secure LAN for KNEC examination data centres; supported Digital Literacy Programme rollout to primary schools across Kenya.

IT Intern | County Government of Trans-Nzoia, ICT Department

May 2016 to Aug 2016

- Built an online helpdesk ticketing system from scratch (PHP/MySQL), reducing issue resolution time by 20% and replacing a fully manual process.
- Maintained web, proxy, and DNS servers; managed Active Directory and departmental user support.

PROGRAMME COMPETENCIES

- **Programme Management:** End-to-end design, implementation, MEL, donor reporting, and programme close-out
- **Partnerships & Stakeholder Engagement:** MoU negotiation, cross-sector coordination, government liaison, donor compliance
- **AI & Digital Inclusion:** AI literacy programme design, workforce reskilling, ASAL community deployment, refugee camp programmes
- **Research & Policy:** Data analysis, AI governance, policy submissions, Kenya Senate engagement
- **Training & Capacity Building:** Curriculum development, trainer coordination, 6,000+ learners reached across Kenya
- **Programme Technology:** Power BI dashboards, Moodle LMS, Google Classroom, Microsoft 365, results-based reporting
- **Technical Foundations:** Python, JavaScript, AWS (Certified): used to build evidence tools that support programme design

INDEPENDENT PROJECTS & RESEARCH

AI Governance Africa: Research and Policy Engagement

2026

Independent Python-based research on AI-driven labour displacement as systemic risk in Sub-Saharan Africa (primary case: Kenya, 17 million workers, ILO data). Core finding: Kenya's 86% informality rate means AI governance frameworks designed for formal employment cannot protect the workers they intend to reach. Submitted individual petition to Kenya Senate on AI Bill 2026, Section 33; proposed three amendments to extend protections to informal workers. Contributed Area 4 (Workforce Reskilling) to the EdTech East Africa joint stakeholder memorandum. Working paper published at ~1,650 words referencing ILO, World Bank, and Kenya National AI Strategy 2025 to 2030.

Kenya Connectivity Map

2025 to Present

Interactive public tool (kenya-connectivity-map.vercel.app) mapping internet and electricity infrastructure across all 47 Kenyan counties: mobile coverage, electricity grid, voltage levels, mini-grid inventory, and KOSAP pipeline sites. Used by NGOs, county governments, and development researchers for programme targeting and infrastructure planning.

Kazi-Pap: AI Job Matching Platform

2026 to Present

Web platform connecting Kenyan youth to employment using AI for job matching and CV optimisation. Built after user research in Nairobi identified an architectural gap in existing job tools. Applied for iHUB EdTech Fellowship Cohort 4 for structured acceleration; deployed as a live case study in the Ajira Digital context.

EDUCATION

BSc Telecommunications & Information Technology | Second Class Honours

Kenyatta University, Nairobi | 2017

CERTIFICATIONS

- Google Project Management Certificate
- ICDL Project Planning & Data Analytics (Power BI)
- AWS Certified Cloud Practitioner
- ALX Virtual Assistant Certified Professional
- Microsoft 365 Certified
- Leadership and Management, Global Leadership Network
- Huawei HCNA, Routing and Switching
